

## Working Prototype - Power Rangers - Slug Notes

## Known Issues:

- When you create a new flashcard (in any of your decks) single long words over 25 characters i.e.  
“mm” would cause the flashcard size to be abnormal resulting in improper functionality.
  - To fix this issue we will have to check that every word on a flashcard will be less than 25 characters. We did not implement this during the sprint because there were other tasks that needed to be done and there are rarely words of this length.
